

PREMIER GROUP

CAPABILITY STATEMENT

Who we are

The Premier Group of Companies is engaged in the installation and maintenance of building services in new and existing building. We are a well-established provider with offices throughout NSW, and South and North Queensland.

The Group has provided these services within the Fire Industry for over 30 years and in 2017 expanded its activities into HVAC.

The Group now offers installation and maintenance services for the most important elements of essential services certification and compliance.

We offer Design, Installation, testing and maintenance for all building of all types throughout Australia and NZ.

We employ over 250 people with a turnover of approximately \$70 million.

Our services

Premier Group offer installation and maintenance for the following equipment;

HVAC	Fire
<ul style="list-style-type: none">· Chillers· Cooling towers and water reticulation systems· Electric/gas boiler systems· Air handling and Fan coil units· VAV Systems· Precise temperature and humidity control environments.· Ventilation and Exhaust systems· Sheet metal Ductwork· VRF/VRV systems.· Package unit and Split systems· Refrigeration systems.· Fire damper and smoke control dampers	<ul style="list-style-type: none">· Fire Sprinkler Systems· Fire pump sets· Fire Hydrants system and booster appliances· Fire Hose reels system· Fire extinguishers and blankets· Fire Alarm and Detection panels· Fire fan control panels· Water storage tanks· Special hazard and Gas suppression· Intrinsically safe fire system installations· Fire and Smoke doors· Passive fire including light weight construction

Our fees

Our fees are based on standard Industry rates, and are highly competitive with other contracting and servicing companies. We are always happy to discuss charges with potential clients.

Our reputation

For over 30 years we have enjoyed recognition in the fire industry for our professionalism, engineering expertise and delivery of both service and maintenance contracts and construction projects.

We are currently engaged on a number of major projects in NSW, QLD, ACT and New Zealand.

Our company owner is the President of the NSW branch of the National Fire Industry Association along with various working groups for state-wide compliance legislation.

Over the last 2 years the Group has adopted the philosophy and approach that was developed for the fire protection business to the HVAC business and we have seen significant success whilst the HVAC business is being built. We have been able to secure major contracts with international providers and have a solid base to further build our HVAC business.

In addition to our skills in engineering, design, data management, analysis, presentation and reporting, our clients value our independence and integrity, our understanding of compliance issues, and our strong ethical standards and privacy protections.

Our advantages

As a large privately owned company we are well positioned to make any changes required to satisfy our clients needs.

The majority of our staff are long term employees (average 15 years +) and have grown with the business.

We are a positive cash-flow funded company with significant retained earnings.

Governance, privacy and confidentiality

We manage data professionally, with due respect for its sensitivity, and with privacy and confidentiality assured through legislation, rigorous data policies and procedures
