

PREMIER
— GROUP —
FIRE HVAC ELECTRICAL

CAPABILITY STATEMENT

OVERVIEW

The **Premier Services Group** is proudly Australian owned and operated. We are a multidisciplined building services company specialising in the design, installation, servicing and maintenance of Fire Protection, HVAC and Electrical Services.

We began as a Fire Protection company in 1987 and have grown to become one of the largest, most trusted and respected Fire Protection Companies in Australia. We have continued to grow and expand our operations and expertise throughout Australasia to include the HVAC and Electrical divisions.

CLIENTS

Our clients include:

- Local Government
- State Government
- Construction and Building Companies
- Building Management Companies
- Interiors and Fitout Companies
- Hotel and Accommodation Companies

MANAGEMENT, PERSONNEL AND REPUTATION

Our Managing Director, with nearly 50 years experience as a fire services engineer, is the NSW President of the National Fire Industry Association, a director of the Australian Construction Industry Forum and a consultant on a number of industry and legislative committees.

All our works are carried out by trade and industry qualified personnel in conjunction with specialist subcontractors to provide a best practice, high quality service across all building classes.

Our technical staff are supported by an experienced team of long term managers and administrative staff underpinned by a strong ISO certified Integrated Management System incorporating Quality, Safety and Environment.

With an average turnover of \$100m and a reputation for professionalism, integrity, knowledge and experience, we give our clients peace of mind and confidence in all the services we provide.

OUR CAPABILITIES

- AFPS & FSD endorsed design and FSS certification
- Engineering and design support
- Automatic fire sprinkler systems
- Fire hose reel systems
- Fire hydrant systems and booster appliances
- Water storage tanks
- Fire detection systems
- Early warning and evacuation systems
- Special hazard / gas suppression systems
- Passive fire systems including light weight construction
- Fire and smoke doors
- Fire fan control panels

- Construction, fitout and maintenance capabilities
- Design and construct
- Medium and low voltage mains and switchboards
- Mission critical uninterrupted power supply services, standby and auxiliary power generation
- Thermal imaging services
- Light and power and lighting control systems
- Exit and emergency lighting systems including emergency lighting control, power failure control, Uninterrupted Power Supply (UPS), alarm and detection systems
- Energy management systems
- Detailed electrical examination (test & tag) services including full audit, reporting and compliance certification
- Audio Visual
- Data and fibre including Cat 6,7 and fibre solutions

- Chillers
- Cooling towers and water reticulation systems
- Electric/gas boiler systems
- VAV systems
- Air handling and fan coil units
- Precise temperature and humidity control environments
- Ventilation and exhaust systems
- Sheet metal ductwork
- VRF/VRV systems
- Package unit and split systems
- Refrigeration systems
- Fire damper and smoke control dampers
